

Collaborative partnership helps transportation engineers increase profitability

- **Autodesk & CGS plus:**
A transportation design software partnership
- **Autodesk Civil 3D and CGS Civil 3D Extensions:**
Empowering transportation engineers

Now transportation engineers can speed the design and analysis of intersections, roundabouts and other traffic designs by leveraging the power of Autodesk® AutoCAD® Civil 3D® and CGS plus Civil 3D Extensions. By utilizing tools such as road rehabilitation, traffic sign design and position, lane widening utilities, drainage design, roadway design standards with EU conformity and more, transportation engineers can dramatically improve both their productivity and the quality of their designs.

CGS Civil 3D Extensions are the culmination of several years of discussions and shared experiences between CGS plus and transportation engineers across Europe, as well as extensive development partnerships between CGS plus and Autodesk.

Working closely together for over 10 years, Autodesk named CGS plus an "Autodesk Preferred Industry partner" for the transportation industry in Europe in 2007.

The powerful partnership between AutoCAD Civil 3D and CGS Civil 3D Extensions has been leveraged extensively by transportation design organizations including Ingenieurbüro Deuter in Germany, Pracownia Perjektowa Drog in Poland, and Dopravní Stavby a Venkovní Architektura s.r.o. in the Czech Republic.

Preferred Industry Partner Relationship

Autodesk is committed to providing the most comprehensive design solutions in the industry. Autodesk has built strong relationships with global software innovators who are leading the way in developing tailored solutions for

Autodesk customers. The Autodesk Preferred Industry Partner program helps customers find companies, with best in class applications and services for their specific design software needs.

Preferred Industry Partner products are built on Autodesk application programming interfaces (APIs) and meet rigorous functional, performance, and quality guidelines. Autodesk works closely with its Preferred Industry Partners to combine the resources, ideas, and creative thinking of these trailblazing companies, keeping Autodesk products and solutions on the leading edge of performance and value.

About Autodesk

Autodesk, Inc. is the world leader in 2D and 3D design software for the manufacturing, building and construction, and media and entertainment markets. Since its introduction of AutoCAD® in 1982, Autodesk has developed the broadest portfolio of state-of-the-art digital prototyping solutions to help customers experience their ideas before they are real. Fortune 1000 companies rely on Autodesk for the tools to visualize, simulate, and analyze real-world performance early in the design process to save time and money, enhance quality, and foster innovation.

About CGS plus

CGS plus is a leading European company specializing in the development of computer aided design software in civil engineering, architecture, and geodesy. The company has established domain expertise in Roadway Design, Hydrology, and Railway Design. CGS plus has a strong presence with over 2,000 customers in over 20 countries including Central and Eastern Europe.

"Thanks to these combined applications, complex functions are now easy to handle which accelerates our planning process. An attractive price/performance ratio together with low maintenance costs was an offer our company could simply not turn down."

– Dipl.Ing. Lars Deuter,
Ingenieurbüro Deuter
Germany

"Together, Autodesk and CGS plus deliver transportation engineers advanced design and analysis tools enabling higher productivity and higher quality roadway design, giving their companies competitive advantage."

– Jay Bhatt
Vice President AEC Solutions
Autodesk
